Create a unique elevator space with artistic techniques.
Every picture and every detail is full of artistic atmosphere.
Let every lift become an art appreciation journey.

A trip to luxury

Exclusive quality and luxury

With luxurious design concepts and top-grade materials, a new chapter in elevator car decoration is opened. Every detail is full of artistic atmosphere, allowing you to appreciate the perfect fusion of luxury and art in every lift.

Plaid pattern

Meet series

Meet the Chosen

When high-grade gray is flooding the market
Chestnut fully demonstrates its modesty, not strong, and infiltrates a little gray and white
It loses its intensity and strength, becomes soft and elegant,
and harmonizes the visual sense to achieve a perfect balance

Streamer series

The facade aesthetic is within reach

Delicate outline, unique aesthetics.
Under the tempering of time, any place
Extraordinary craftsmanship makes the trance heart bright

Champagne

Landing door

Bronze
EH-V002B

Black Titanium
EH-V002C

EH-V002A

Decoration information

Ceiling	Hairline stainless steel embedded light strip		
Back wall	The center plate is made of stainless steel with a textured pattern, the auxiliary plate is made of stainless steel with a champagne gold pattern and a rounded corner, and a light strip is embedded in the middle		
Side wall	Black cloth wood veneer with black titanium gold-grained decorative strip in the middle		
Baseboard	Champagne Blonde Stainless Steel	Floor	White rock plate

Charm Color

Wash the prosperity and feel life

Luxurious and elegant, it is the perfect combination of leather and industrial products. Using the unique texture of leather fabrics, it shows a cool and uninhibited style, making the originally monotonous space full all of a sudden and creating a smart sensory effect.

Hermès

Makeup Series

Harmonious space is more than that

The overall design has clear lines and fine shapes.
It represents a fashion of returning to nature, using wood to show its most primitive state. With the help of modern elements, it creates a different ecological world.
The elegant and simple style creates an extraordinary living space in harmony.

Marble

EH-V005A

Decoration information

Ceiling	Light-colored wood veneer, small spotlight in the middle, white veneer edging all around, hidden light strip on top

Features of aluminum alloy derrick

1. Industrial aluminum alloy is used, the frame structure is compact, and the shaft area is saved;
2. The aluminum alloy interface is designed according to the floor height, and the hidden section interface is processed. There are no connectors and bolts on the inside, and the frame is seamless and beautiful;
3. With the same color aluminum alloy door panel, the whole staircase has no color difference and is integrated

Dedicated host system

The advanced VVVF full-closed-loop servo control technology is applied to the door machine system, and a new generation of permanent magnet synchronous motor and synchronous door knife integration technology is adopted to realize the synchronous opening and closing of the hall door and truly achieve high accuracy of elevator door opening and closing control and stable operation. And high efficiency and energy saving.

Intelligent control system

The new generation of high-intelligence and high-integration household elevator control cabinet not only has all the standard functions of the all-in-one controller, but also incorporates the ARD function and the Internet of Things technology; the entire control cabinet is small and exquisite, noble and elegant, just like a rare item. Electrical artwork can be flexibly prevented from being anywhere near the shaft.

Green, make life better

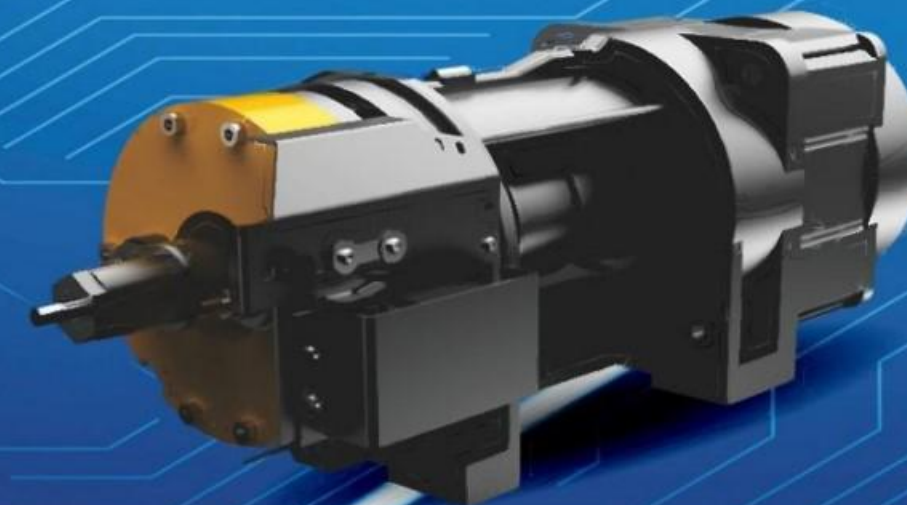

ENJOY HOME series elevators consume less energy while achieving excellent performance. Household voltage (220V) can work normally, no need to specially modify the power supply system, and it is compatible with industrial voltage, saving you worry and effort. High operating efficiency, energy saving and environmental protection, provide you with a green and comfortable elevator environment.

SECUBWSYEM

Steel belt type permanent magnet synchronous gearless traction machine

Compared with conventional traction machine, Steel belt type permanent magnet synchronous gearless traction machine, small size; light weight; traction shaft diameter is only 100mm, and high performance; low energy consumption; low noise, all bearings are equipped with imported bearings, which prolong the service life of the traction machine.

Healthy elevators

Elevator Intelligent Cloud Service

Through the establishment of the company's independent data and monitoring center through the intelligent cloud, you can see and monitor the running status of the elevator in real time, give early warning of elevator faults, get timely information on elevator faults, and conduct remote guidance and troubleshooting to ensure customer safety in a timely manner.

Mobile APP remote calling system(optional)

Passengers can remotely call elevators through the mobile phone terminal call elevator APP software, realize the network cloud elevator call function, avoid touching the button, and control the operating status of the elevator at the same time.

Intelligent face recognition system(optional)

Elevator floor registration system based on face recognition method. After the user swipes the face to register, the data is synchronized to the face recognition module of the elevator terminal, and the authorized users are restricted to take the elevator.

Car automatic cleaning and antibacterial system(optional)

The call ladder box panel is made of antibacterial-bacteriostatic stainless steel, a black background and white character broken code LED display board, and a non-contact button, which can respond within 5mm without contact and realize the call function.

Voice control system(optional)

Optional voice control system, no need to touch the elevator button, you can directly have a voice dialogue with the elevator, zero contact in the elevator process, to achieve a smart elevator experience.
